

LAB 1 – BASIC NETWORK INFRASTRUCTURE

Part 1: Network Infrastructure

Install and configure your lab test environment according to the [network drawing](#) and predefined IP-plan. This lab must be executed on hardware.

Scope definition:

- Install, configure and test the network infrastructure based on the network drawing and the IP-plan;
- Proactively determine what is needed to ensure the continuity of the system and network infrastructure;
- Apply best practices to configuration and network security;
- Draw up an IP plan and document your solution;
